CLASS	PROGRAMME OUTCOMES	PROGRAMME SPECIFIC OUTCOMES (PSOS)	COURSE OUTCOMES (COS)
B.sc I	<p>To impart knowledge of science to develop scientific attitude, open minded, critical, curious</p> <p>.To develop skill in practical work, experiments and laboratory materials and equipment's along with the collection and interpretation of scientific data to contribute the science.</p>	<p>. To understands the basic ideas of basic facts and concepts in chemistry while retaining the excitement of chemistry</p> <p>.To promote understanding of basic facts and concept s in chemistry while retaining the excitement of chemistry. To develop problem solving skills in students.</p>	<p>.Understand the principles of various fields of chemistry.</p> <p>.Develop as independent thinkers who are responsible for their own learning.</p> <p>.Develop transferrable quantitative skills. Be able to work with others demonstrating leadership and collaborative skills. To .provide knowledge on theory and application of different analytical techniques used chemistry. Students will able to develop a skill in the chromatography techniques.</p>
B.sc II	<p>Students will be empowered with basic to advance knowledge of organic and inorganic, organic, chemistry, Analyse organic compounds and gain knowledge about the method of organic compound preparations.</p>	<p>. To understand the all basic fact s and concepts of inorganic and organic chemistry students will learn the atomic structure and basic concepts. The unit has been designed to give van insight into almost all aspects stereochemistry and to build a solid platform in this specific field.</p>	<p>. Learning and understanding conductivity and transport number of the aqueous solutions with different applications. . Learning and understanding surface phenomena at heterogeneous surface. . Students will learn the basic knowledge about the compound</p>
B.sc III	<p>.To make student capable of studying chemistry in academic and industrial courses and to expose students to different processes used in industries and their application.</p> <p>. To develop the power of appreciation, the achievements in chemistry and role in nature and society</p> <p>.The branches of chemistry such as organic chemistry, inorganic chemistry, physical &amp; analytical chemistry expose the diversified aspects of chemistry where the students experience a broader outlook of the subject.</p>	<p>.To promote understanding of basic facts and concepts in chemistry while retaining the excitement of chemistry. .The students will understand the existence of matter in the universe as solids, liquids, and gases which are composed of molecules, atoms and sub atomic particles.</p>	<p>. Useful for study of role of acids and basses in chemistry.</p> <p>Useful to understand geometry, stability and nature of bonding between metal ion and ligand in complex.</p> <p>.understanding of energy associated with electromagnetic radiation and its use in analytical technique To develop skills required in chemistry such as the proper handling of apparatus and chemicals</p>
